

THARUN MOHITE VASANTH

London, England | +44 7508276428 | kumartharun2612@gmail.com

Portfolio: <https://tharun-2612.github.io> | GitHub: <https://github.com/tharun-2612> | LinkedIn: <https://www.linkedin.com/in/tharun-kumar-46815b294>

PROFESSIONAL SUMMARY

MSc Information Technology graduate with project experience across C++ desktop browser development, advanced WordPress theme/plugin engineering, React/TypeScript dashboards, Node/Express authentication systems, and PHP/MySQL applications. Built AstraX Browser with Qt WebEngine and Engine Lab internals, plus Talent Board, a production-style WordPress job portal with CPTs, taxonomies, role-based dashboards, REST API endpoints, AJAX filters, secure frontend forms, email notifications, and seeded demo data. Strong in JavaScript, PHP, WordPress, Node.js, Express, MySQL, MongoDB, Git, debugging, deployment workflows, and AI-assisted development while reviewing and testing generated code.

TECHNICAL SKILLS

Languages and UI: C++20, PHP, JavaScript, TypeScript fundamentals, React fundamentals, HTML5, CSS3, Vite, Qt 6 Widgets, Qt WebEngine, WordPress theme templates, responsive design, accessibility basics

Back-End and Data: Node.js, Express.js, WordPress plugin development, MySQL, MongoDB Atlas, Mongoose, REST APIs, AJAX, WP_Query, custom post types, taxonomies, user meta, JSON, SQL basics

AI-Assisted Development: Uses AI tools for learning, debugging, refactoring, documentation, and feature development while reviewing and testing generated code

Authentication and Security: JWT, bcrypt password hashing, 2FA/MFA, email OTP, WordPress nonces, sanitization, escaping, honeypot fields, role checks, rate limiting, environment variables

Tools and Delivery: Git, GitHub, GitHub Pages, GitHub Actions/Releases, Docker Compose, XAMPP, CMake, Ninja, Qt Test, Render, InfinityFree, Postman, VS Code, npm, Composer, PHPCS

PROJECTS

AstraX Browser - C++20, Qt 6, Qt WebEngine, CMake

GitHub: <https://github.com/tharun-2612/AstraX-Browser> | Release: <https://github.com/tharun-2612/AstraX-Browser/releases/tag/v1.0.0>

Built a C++20 desktop browser using Qt 6 and Qt WebEngine, combining Chromium-powered browsing with custom browser features and persistent user data.

Implemented tabs, bookmarks, history, downloads, private mode, page information, find-in-page, Developer Tools, and a custom start dashboard.

Built AstraX Search to rank local bookmarks and browsing history with live suggestions before falling back to a configured web search provider.

Created Engine Lab with custom HTML parsing, DOM viewing, CSS parsing, selector matching, specificity inspection, and basic block layout boxes.

Packaged a portable Windows release using CMake, Ninja, Qt deployment tooling, and GitHub Releases.

Talent Board Job Portal - WordPress, PHP, MySQL, REST API

Live: <https://tb.xo.je/wp/jobs/> | GitHub: <https://github.com/tharun-2612/talent-board>

Built a production-style WordPress job portal using a custom theme for templates/UI and a custom core plugin for business logic, roles, forms, REST API, demo data, and email notifications.

Created custom post types for Jobs, Companies, and Applications, plus job category and location taxonomies using WordPress registration APIs.

Built employer and candidate dashboards for managing jobs, saving jobs, viewing applicants, and tracking application statuses such as Pending, Reviewed, Shortlisted, and Rejected.

Implemented frontend job submission, job application forms, AJAX search/filtering, saved jobs with user meta, and wp_mail() notifications.

Hardened frontend workflows with nonces, sanitization, escaping, honeypot fields, role checks, ownership checks, and rate limiting; prepared Docker/XAMPP setup and seeded demo data.

PulseTrade Real-Time Market Dashboard - React, TypeScript, Vite

Live: <https://tharun-2612.github.io/realtime-market-dashboard> | GitHub: <https://github.com/tharun-2612/realtime-market-dashboard>

Built a responsive React/TypeScript dashboard simulating live market data, portfolio metrics, SVG charts, order book depth, and trade activity.

Implemented a simulated WebSocket-style feed to update UI state, latency, sequence count, chart values, and market movement.

Deployed the project using GitHub Pages and GitHub Actions with a production Vite build.

Secure Authentication Web App - Node.js, Express, MongoDB Atlas

Live: <https://secure-authentication-webservice.onrender.com> | GitHub: <https://github.com/tharun-2612/2324425-CMM500-project>

Built a full-stack authentication app with registration, login, password validation, protected flows, and admin metrics.

Implemented bcrypt password hashing, JWT login sessions, email OTP verification, and rate-limited login attempts.

Designed MongoDB/Mongoose models for users, OTP verification records, and login attempts using MongoDB Atlas.

Managed environment variables and deployment debugging on Render, including database connection and SMTP limitations.

TeamO Mart Marketplace Web App - PHP, MySQL, HTML, CSS, JavaScript

Live: <https://teammarto.xo.je/login.php> | GitHub: <https://github.com/tharun-2612/CMM040-Increment-A0>

Developed a PHP/MySQL marketplace platform with login, listings, search, cart, item management, and delivery/payment flows.

Configured live PHP hosting on InfinityFree and connected the application to a MySQL database.

Cooking Foodie Recipe Web App - PHP, MySQL, HTML, CSS, JavaScript

Live: <https://cookingfoodierecipe.xo.je/login.php> | GitHub: <https://github.com/tharun-2612/CMM007-Project>

Built a PHP/MySQL recipe app with registration, login, recipe viewing, add/edit/delete functionality, and role-based flows.

Connected the project to MySQL on live hosting and updated configuration from local development to production database settings.

EXPERIENCE

Trading Assistant - Sainsbury's, Kilburn, London | Jul 2025 - Present

- Support customers, resolve day-to-day queries, maintain store standards, replenish stock, follow procedures, and prioritise tasks accurately in a fast-paced retail environment.

Customer Service Assistant - Premier Stores, Aberdeen | Oct 2023 - Nov 2024

- Handled customer queries, transactions, stock organisation, product layout, and daily operations while developing clear communication, issue resolution, and attention to detail.

Student Volunteer - IT Support, Tamil Nadu, India | Jan 2020 - Mar 2021

- Installed and configured systems, supported users, troubleshoot basic hardware/software issues, explained fixes to non-technical users, and documented common problems.

Financial Analyst Intern - Waves Fashion, Chennai | Aug 2019 - Feb 2020

- Automated reporting workflows, cleaned and organised data, prepared spreadsheet summaries, and supported cost optimisation analysis for business-process reporting.

EDUCATION

MSc Information Technology - Robert Gordon University, Aberdeen, Scotland, UK | 2023 - 2024

B.Com Information Systems - Guru Nanak College / University of Madras, Chennai, India | 2020 - 2023
